RIDHI SUREKA

+91-9599202019 | ridhisureka1@gmail.com | Portfolio | GitHub | LeetCode | LinkedIn

PROFESSIONAL SUMMARY

Software Engineering student (B.Tech, AI & Machine Learning) with hands-on experience building agentic AI systems — MCP tool servers and agent-calling workflows on Microsoft Azure, RAG-based conversational agents, and LLM-integrated applications — using Python and modern full-stack technologies. Solved 500+ DSA problems across LeetCode and GeeksforGeeks. Gained this experience through internships at Mahindra AI and Wisdom Marketing. Seeking an Agentic AI Developer / Software Development Engineer Internship role.

EXPERIENCE

Mahindra AI *Mumbai, Maharashtra*

AI/Frontend Intern Jun 2026 – Aug 2026

- **MCP tooling & agent workflows:** learned and applied Model Context Protocol (MCP) tool development and agent-calling workflows on Microsoft Azure, integrating external tools with AI agents for the Club Mahindra AI Chatbot on the mAIna.ai platform.
- **Agent architecture:** worked on a conversational agent architecture combining RAG (Retrieval-Augmented Generation) and prompt-based response generation for more accurate, context-aware replies.
- **Chatbot tools:** built and improved AI chatbot tools including Calendar integration, and tested features to improve reliability and overall user experience.
- **UI development:** developed and enhanced UI components for the chatbot using React.js and Tailwind CSS.

Wisdom Marketing *Faridabad, Haryana*

Web Developer Intern Jun 2025 – Jul 2025

- **Performance:** improved application performance and reduced page load time by optimizing React.js components and implementing lazy loading.
- **Frontend components:** developed scalable, reusable components using React.js, Next.js, and Tailwind CSS.
- **API integration:** integrated REST APIs and managed asynchronous data handling for frontend-backend communication.

PROJECTS

AutoMind – AI Predictive Maintenance Platform | *Python, Flask, Next.js, Tailwind CSS* GitHub | Live

- Designed a scalable predictive maintenance dashboard with a Python/Flask backend serving ML model predictions to a React.js frontend.
- Implemented real-time data visualization to surface machine learning predictions and actionable insights.
- Built the integration layer between frontend components and backend ML services for reliable data exchange.

Adidas Clone – E-Commerce Application | *React.js, Firebase, OpenAI API* GitHub | Live

- Integrated an OpenAI-powered chatbot for LLM-based product assistance, alongside Firebase Authentication for secure sessions.
- Built a dynamic e-commerce frontend with reusable components, product filtering, and protected routing.
- Achieved 100 SEO and 86 Accessibility scores in Lighthouse audits through semantic, accessibility-focused development.

EDUCATION

Vivekananda Institute of Professional Studies *Delhi, India*

B.Tech in Artificial Intelligence and Machine Learning; CGPA: 9.0 2023 – 2027

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript

AI & Agentic Systems: Model Context Protocol (MCP) tool development, FastMCP, Agent-calling workflows, RAG (Retrieval-Augmented Generation), OpenAI API, AI Chatbot Development, Prompt Engineering

Backend & APIs: FastAPI, Flask, Node.js, REST APIs

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3

Databases: SQL, Firebase

Cloud & Tools: Microsoft Azure, AWS, Git, GitHub, WebSockets

Computer Science: Data Structures & Algorithms, OOP, Database Management Systems

ACHIEVEMENTS & CERTIFICATIONS

- **500+ DSA Problems:** solved 500+ Data Structures and Algorithms problems across LeetCode and GeeksforGeeks.
- **British Airways – Data Science Virtual Internship (Forage), Jul 2023:** analyzed customer interaction datasets to uncover satisfaction/churn patterns and proposed data-driven segmentation strategies.
- **EY TEACHATHON 6.0:** Finalist among the Top 10 teams.
- **ABESIT Hackathon:** Winner.
